

**Parks & Open Space Commission
Mid-Inventory Review Presentation
City Council Meeting - December 15, 2008**

COUNCIL DISCUSSION

1. Design for getting public input: Ask people to balance priorities with constraints. Give people a "budget" where they have to identify trade-offs.
2. Inventory areas:
 - Wetlands boardwalk possibilities
 - A lot of different environments/diversity: Coles Road wetlands, Saratoga "canyon", the "highlands"
 - Spoke pattern: "arms" of critical areas, create a walking/trails grid to connect areas
3. Educate public with signage and walking maps
4. Shared-use roads as public space: walking, bikes, cars
5. Comp Plan Transportation Committee: Bob Waterman can share maps and data including trails
6. Create walkers club: adopt trails and maintain
7. Trail easements: What are liability issues?
