

**PUBLIC NOTIFICATION**  
**CITY OF LANGLEY**  
**WATER CONSERVATION REQUEST**

---

The City of Langley Water Department is requesting  
**ALL CITY WATER SYSTEM USERS**  
restrict outdoor and other unnecessary water usage until further  
notice.

In February, the Water Department began investigating a reduction in the production capacity in our deep water well. Two additional wells with limited capacity are online while work is ongoing. We found holes in the 280' of well drop piping as the cause of reduced capacity. Further a video inspection was conducted to evaluate the condition of the well and revealed sediment build up. The remaining work to clean the well and replace the piping is scheduled in the upcoming weeks. With the warmer weather and higher demands the smaller wells are running 24 hours a day to keep up.

Until the remaining work is complete and the deep water well is returned to service we ask that you limit your outdoor and other unnecessary water usage.

*Thank you for your effort.*
